

Marketing Campaign – Advanced Effectiveness, Sales & Customer Funnel Report

Prepared By: Mohamed Fouad
Role: Data Analyst

Professional Summary

This report provides a deep analysis of campaign effectiveness, product profitability, and customer segmentation. It integrates acceptance rates, product share, demographic pivots, and complaint trends to highlight **profit density, ROI, and growth opportunities**. Scenario-based forecasts are included to quantify the impact of strategic changes.

Key Performance Indicators (KPIs)

- Total Units Sold: **1,000,000**
- Average Customer Income: **\$51.84K**
- Total Campaign Acceptance: **663 customers**
- Overall Campaign Acceptance Rate: **13.3%**
- Top Product Category: **Drinks (50.6% share, ~506K units)**
- Highest Acceptance Campaign: **Cmp4 (25.0%, 166 accepted)**
- Lowest Acceptance Campaign: **Cmp2 (4.5%, 30 accepted)**
- Complaint Ratio: **0.5% (low risk)**
- Net Profit Margin Estimate: **18–22% (based on product mix and margins)**

Business Performance Insights

1. Campaign ROI & Profit Density

- Cmp4: Conversion ratio ~7.5% → strong ROI.
- Cmp2: Conversion ratio ~1.3% → inefficient, high cost per acceptance.
- Cmp3 & Cmp5: Balanced, contributing ~24% each to total acceptance.

Scenario Forecast: Redirecting 20% of Cmp2 budget (~\$50K) into Cmp4 could increase total acceptance by ~80 customers, boosting profit by 12–15%.

2. Product Profitability Ratios

- Drinks: 506K units, margin ~15% → ~75K profit units equivalent.
- Meat: 272K units, margin ~20% → ~54K profit units equivalent.
- Gold: 72K units, margin ~40% → ~29K profit units equivalent.

Scenario Forecast: Bundling Drinks + Gold could increase basket profitability by 18% per transaction, raising overall margin by ~3–5%.

3. Demographic Profit Drivers

- Education: Bachelor's Degree holders contribute ~47% of drinks and ~55% of meat sales.
- Children: No-children households drive ~45% of sales, especially premium categories.
- Generations: Baby Boomers & Gen X (1946–1980) dominate purchases. Millennials underperform.

- Relationship Status: Engaged customers contribute 64% of drinks and 61K gold units.

Scenario Forecast: Targeting “Premium Professionals” (Engaged, Bachelor’s, no children, 45–65 years) could increase gold sales by 20%, adding ~12K units annually.

4. Complaint & Risk Analysis

- Average complaints: 2–3 per month.
- Historical spike in 2013 (11 complaints).

Scenario Forecast: Improving complaint handling could reduce churn by 0.2%, equivalent to ~2,000 units retained annually.

Strategic Recommendations

Campaign Optimization

- Phase out or restructure Cmp2.
- Scale Cmp4 & Cmp5 with targeted offers.
- Introduce profit-per-unit KPI alongside acceptance rate.

Product Strategy

- Drinks = traffic driver; Gold = profit driver.
- Bundle Drinks + Meat + Gold to balance volume and margin.
- Apply tiered pricing for Gold to capture aspirational buyers.

Customer Segmentation Strategy

- Focus on Premium Professionals (Engaged, Bachelor’ s, no children, 45 - 65).
- Secondary: Doctorate/Master’ s holders with niche premium offers.

- Millennials: lifestyle-driven, **digital-first campaigns** to grow CLV.

Delivery & Operations

- Apply **fast delivery** to premium SKUs (gold, meat).
- Maintain standard delivery for drinks to control costs.

Growth Opportunities

- Launch **loyalty programs** for engaged customers.
- Expand **cross-selling** in campaigns (e.g., “Buy Drinks, Get Gold Discount”).
- Track SKU-level profit contribution **monthly** to identify rising/declining performers.

Executive Conclusion

The campaign analysis reveals a **Pareto effect**: a small set of products (Drinks, Meat, Gold) and demographics (**Engaged, Bachelor’ s, no children, 45 - 65**) drive the majority of profitability. Strategic reallocation of campaign spend, bundling, and premium targeting can increase overall profit margins by **15 - 20%**, reduce wasted spend, and strengthen long-term customer loyalty.
